EXTERNALLY FUNDED RESEARCH GRANTS

- Grant # N/A Donelan (PI) 8/16 - 7/18
Gorden and Betty Moore Foundation
Aging patients and health professionals: New roles in a changing health system.
The purpose of this study is to trace historic and current roles of patients, caregivers, social workers, nurses, and physicians in the US healthcare system to map key domains of competencies, roles, and collective practice to create and then apply an analytic framework to gather empirical data to inform cost and quality of care models for frail elders living in the community.
Role: Consultant
- 1R01DE023061-01A1 Kalenderian (PI) 9/13 - 4/17
National Institute of Dental and Craniofacial Research (NIH-NIDCR)
A whole systems approach to implementing standardized dental diagnostic terms.
The purpose of this study is to develop and disseminate an implementation toolkit for the adoption of dental diagnostic terms that will enable the profession to undertake fundamental quality improvement efforts such as the most effective and cost-effective treatments for any given diagnosis.
Role: Co-Investigator
- 1R01DE022628-01A1 Walji (PI) 3/13 - 11/17
National Institute of Dental and Craniofacial Research (NIH-NIDCR)
Developing a patient safety system for dentistry.
The purpose of this study is to understand the occurrence and causes of dental adverse events and to develop empirically based interventions to minimize their occurrence in order to ensure that patients receive the safest oral healthcare possible.
Role: Consultant
- Grant # N/A Ng (PI) 8/13 - 3/15
DentaQuest Foundation Oral Health Integration Grant; Phase III
Improving dental care team knowledge and communication of caries prevention and management.
The purpose of this national demonstration project is to expand a previously piloted training program for clinical and administrative staff to strengthen the education and disease management of the parents of children at high risk for dental caries.
Role: Co-Investigator
- DE20759 Kinnunen (PI) 9/11 - 8/12
National Institute of Dental and Craniofacial Research (NIH-NIDCR)
Oral cancer detection methods in community settings.
The purpose of this project is to identify the benefits, barriers, and capacity to perform oral cancer screening in skilled nursing facilities across the Commonwealth of Massachusetts.
Role: Co-Investigator
- 1 D884HP20125-01-00 Ng (PI) 9/10 - 6/15
Health Resources and Services Administration (HRSA)
Training pediatric dental and medical residents on chronic disease management of caries.
The purpose of this project is to develop and implement effective training programs on chronic disease management of dental caries for residents in pediatric dentistry and for all clinical and support staff.
Role: Consultant
- Grant # N/A Ng (PI) 2/10 - 1/12
DentaQuest Foundation Oral Health Integration Grant
Improving dental care team knowledge and communication of caries prevention and management.

The purpose of this project is to develop a training program for clinical and administrative staff to strengthen the education and disease management of the parents of children at high risk for dental caries.

Role: Co-Investigator

Grant # N/A Ng (PI) 3/08 - 12/09

DentaQuest Institute Demonstration project
