

Study Abroad for French Majors/Minors

Approved Study Abroad Programs

Study abroad can help you prepare for your professional life in today's global context

Can I afford to study abroad?

Many study abroad opportunities can be affordable. Program fees often cover full-time tuition, housing, and most meals. Federal and State aid applies to study abroad, and in some cases, you will receive an increased award to cover additional expenses. The Study Abroad Office offers many scholarships for studying abroad, ranging from \$250 – \$2500. Regional and national scholarships also exist to help students based on need, merit, where/what you will be studying, and other factors. With assistance from the Study Abroad Office, a faculty member or the Writing Center, you can write a competitive essay.

Do credits go towards my requirements?

The programs listed here are approved by the Modern Lit and Language Department and the Study Abroad office, meaning there is established confidence in the academic quality, safety, and student support services available in each program. You will need to get your individual course selections approved through a petition process before you leave Simmons, but all of the programs will provide pre-departure and on-site orientation, housing, academic support, international health insurance, and on-site logistical assistance.

How do I start?

1. Go to an Information Session
2. Begin researching program options
3. See your financial aid advisor
4. Talk with your academic advisor
5. Choose a program and apply!
